

SoFilm

Product description

SoFilm is a sterile incision film consisting of a transparent polyurethane film single coated with a pressure- and temperature-sensitive adhesive and supplied with a 120 grams white release liner and a 5cm wide transparent finger lift. SoFilm is resistant to water, body fluids, detergents and alcohol. SoFilm is individually wrapped and pouched and sterilised by EO.

Appliance

SoFilm is intended to be applied on the patient's skin for covering and protecting during surgical interventions. The incision is made through the film.

Quality assurance

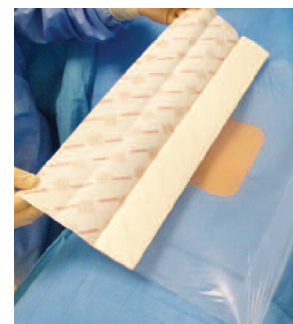

SoFilm is a medical device and a CE mark is placed on the products' packaging. A certificate of the manufacturer that the product meets all of the requirements of the Medical Devices Directive (MDD 93/42/EEC) is available upon request.

Advantages

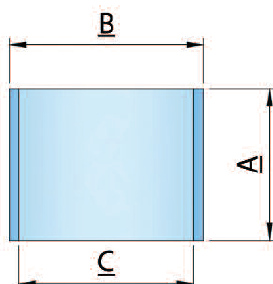

- During surgery, SoFilm remains unaffected by body fluids and other fluids used during surgery.
- SoFilm is coated with a special type of adhesive that ensures maximum performance during surgical procedures.

Recommendations, warnings and precautions

- Improper use of SoFilm can cause skin irritation.
- Only apply SoFilm to a fully dried and intact skin. Do not apply SoFilm to fragile skin or premature infants.
- The skin must be dry and free of oil before applying SoFilm.
- The adhesive strength is highly dependent on the condition of the skin, its dryness and any applied disinfectants (and their contents).
- Always remove SoFilm from the skin (even in the case of healthy skin) in such a way that the skin is not pulled in an upward direction. We recommend removing the SoFilm from the skin carefully in a movement parallel to the skin. This means at an angle of 180 degrees.

SoFilm

PROPERTIES

Sterile		yes, EO
Construction 1) Polyurethane carrier 2) Adhesive 3) Release liner		PU adhesive white with MEDIBERG print
1) polyurethane carrier Thickness Color		25µm ± 3µm transparent
2) Adhesive Coating Peel (FTM1/20min.)		35g/m² ± 10% min. 10N / 25mm
3) Release liner Type Color Grammage		one side easy release silicone coated release paper white with MEDIBERG print 115 - 125g/m²
Fingerlifts Color Width		transparent 2x 5cm
Biocompatibility		Tested for cytotoxicity, skin irritation and skin sensitization
Latex		latex free
Storage Temperature (optimal) (keep away from heat and/or flame) Light (protect from prolonged exposure to bright sunlight and strong U.V. light) Humidity (avoid damp storage conditions)		15 - 25°C dark conditions 40 - 70%
Reusability		not reusable
